Subject: Request for restarts - Bruce Power - Summary decision

Bonjour,

The Commission authorizes Bruce Power's request for the restart of Bruce Units 4, 5, 7 and 8 following any planned or unplanned outages, subject to all other pressure tube fitness for service requirements in the licensing basis being satisfied.

The Commission has determined that Bruce Units 4, 5, 7 and 8 have satisfied the terms of the DO Order and that, consequently, these units are no longer subject to the DO Order. A record of decision, including reasons for decision, will follow at a later date.

The Commission wishes to extend its appreciation to the participants for an efficient and productive approval process, recognizing that it was an accelerated and intensive process.

Regards,

Marc Leblanc
